1. Instructions

1.1 General Description

This digital trail camera with MMS function can work automatically day and night. It can be triggered by any movement of human (or animals) in a certain region monitored by motion sensor, and then automatically captures pictures (up to 12M pixels) or records 1080p or HD video clips (WVGA or QVGA).

During daytime it begins to take color photos and video till light is not enough, then it begins to take monochrome photos and video.

It supports 2G/GSM/MMS/SMTP/SMS. And it is waterproof IP54.

1.2 Camera Body Interface

It has the following interfaces: USB connector, MICRO SD-Card Slot, SIM card slot, TV output and external DC power connector.

1.3 Camera components and features

- 1) Bottom Cover
- 2) Micro SD-Card Slot
- 3) USB Connector
- 4) TV Out connector
- 5) PIR
- 6) Infrared Flash
- 7) Lens
- 8) GSM Antenna

- 9) 2 inch color LCD Display
- 10) Sound recorder
- 11) SIM card slot
- 12) Lock
- 13) Power witch
- 14) Battery Depot
- 15) Portable remote controller

1.4 Remote Control

The remote control is primarily used for menu settings and password input. This is wireless remote control. The maximum remote distance is 9 meters.

Note: Press the punctuation “” for laser light.

Note (Under TEST mode):

1. Press “Shot” directly, the camera will take picture or video directly.
2. Press “OK” directly, the picture or video recorded can be viewed.
3. Viewing picture, press “Up” or “Down”.
4. Viewing video, press “Left” to start, again to stop, press “OK” to return.

Shooting Information Display

When power switch is turn to TEST position, the shooting information will be displayed in the monitor.

1.5 Brief Introduction for SIM card and Signal

There are two SIM card icons.  It means the SIM card is inserted and it can work well.  It means the network signal in your local place is very good.

1.6 Supported Format

Item	Format
Photo	JPG
Video	AVI

2. Easy Operation

2.1 Power Supply

To supply power for the camera, 8X AA batteries are needed.

The following batteries with 1.5V output can be used:

1. High-density and high-performance alkaline batteries (Recommended)
2. Rechargeable alkaline batteries
3. Rechargeable NIMH batteries

When in Test Mode, camera will be automatically shut down to save power if without any operation within 3 minutes; it could be waked up by any movement detection.

When in low power state, camera will also automatically shut down. Please change the batteries in time.

2.2 Insert the MICROSD-card and the SIM-card

Insert Micro SD-card and SIM card into the card slot.

When use MMS/E-mail function, be sure to insert SIM card into the SIM-card slot correctly.

2.3 Enter into the TEST Mode

Turn the power switch to the TEST position to enter into the TEST mode. There are some functions in TEST mode: user setting /manually capturing/preview.

2.3.1 User Setting

Press the MENU button. The camera can be set (mode, interval, picture resolution, video resolution& length, etc.) the detailed operations will be described in following chapter.

2.3.2 Manual Capturing

Press OK to manually capture photos or record video.

2.3.3 View Images or Videos

There are two ways to view the captured images or videos:

1. LCD screen on camera
2. TV monitors which connects to camera with TV cable

Press right arrow to view captured files, the latest image will be shown in the LCD screen or TV monitor. Press UP to view the last and press DOWN for the next. The detailed operations like deleting images or videos will be described in "Advanced Operations" chapter.

2.4 Power on and Enter into the ON Mode

Before switching on, please pay attention to the following items:

1. Do not face light source directly. which may cause false triggers
2. The height from ground for placing should be 1-2 meters. For example for deer height is good size appropriately.

After switch to ON mode, the red light will flash for about 10s. then you can lock the bottom cover and deploy your camera.

Power Off: Slide the power switch to OFF position to turn off the camera.

Please remove the battery if the camera will not be used for a long time.

3. Advanced Operations

User setting can only be done in TEST mode and the remote control is needed.

1. Insert TF card and SIM card to camera, put batteries in cam, screw the antenna, and then turn camera to test mode, check there are  and  on the camera screen. Then connect the camera to the PC with the included USB cable insert CD to computer, open and then double click 

2. Choose  or  in

, Go to  table, select 

3. Insert  and 

4. Fill in  and or 

5. Go to , choose 

6. Click  button and save as Parameter.dat to Micro SD card

7. Plug USB cable from camera

8. Go to

in camera menu, check the sub setting is the

same with above setting

9. Turn camera to on mode

3.2.3 SMTP setting

1. Insert card and SIM to camera, put batteries in cam, screw antenna to it then turn camera to test mode, check there are signal bar and "SIM" on the camera screen. Then connect the camera to the PC with the included USB cable insert CD to computer, open and then double click 

2. Choose   or  , Go to

 table, select  

3. Insert all

4. Fill in sender email info in

and

5. Go to  table, choose

6. Click  button and save as  to MICROSD card

7. Plug USB cable from camera

8. Go to

in cam menu, check the sub

setting is the same with above setting

9. Turn camera to on mode

10. Product operation video link: <https://www.youtube.com/watch?v=fhniN3up2dE>

3.3 SMS Command Code

mms/smtp need to be set 'on' mode before using the sms command

500 take picture
(both mms and smtp mode)

505 take picture and send to the mobile who sends sms

520 check the picture quantity and battery status
(both mms and smtp mode)

530 turn on camera
(both mms and smtp mode)

531 turn camera to sleeping mode
(Can work in both mms and smtp mode)

4. Cautions

1. The external power voltage should be 6.0V.
2. Please unlock and format the Micro SD card when you first use it.
3. Insert the Micro SD card when the power switch is at OFF position.
4. Do not insert or take out the Micro SD card when the power switch is at ON position.
5. Please ensure power is good enough when firmware upgrade, otherwise the upgrade process could be stopped.
6. As communications networks may vary we can't guarantee 100% MMS and GPRS can work fine

5. Technical Specifications

Image Sensor Type (True Megapixels)	5 Mega Pixels Color CMOS
Memory	Micro SD Card 8GB~32GB
